

## **Business Analyst**

Doreen Evans Associates, Inc (DEA) [www.doreenevans.com](http://www.doreenevans.com), helps clients improve their ability to elicit, analyze, document, confirm, test, trace and manage business and system requirements throughout the life of a project. Our Business Analysis practice provides resources to ensure success on critical business projects where clients do not have requirements experts available on staff. In addition, DEA works with clients to help them establish their own internal Centers of Requirements Excellence and business analysis competency.

Our Business Analysts serve as the liaison between the business community (subject matter experts) and the technical solution development team, using models and a process-driven approach. We are looking for committed individuals to join our team to help us to continue to provide best of breed solutions for BA competency while serving in the role Business Analyst.

### **Responsibilities:**

- Business requirements elicitation: can include facilitation of requirements gathering workshops, using model-driven requirements gathering techniques, interviews, user interface mockups (prototypes), review of existing documentation, conducting external research
- Business analysis can include: business process mapping, opportunity analysis, redesign of business processes, user interface prototypes, work flow diagrams, use cases, use case activity diagrams, UML class diagrams, business rules identification, conceptual/logical data model/documentation, business/system architecture diagrams, data flow diagrams, state models
- Requirements verification and validation can include: prototyping, requirements traceability matrix, testing scenarios and requirements-based test cases
- Use of requirements life cycle tools to develop models, publish and manage requirements deliverables

### **Qualifications:**

- 3+ years business analysis/requirements elicitation and specification experience
- Bachelor's degree, concentration in business or IS a plus
- Professional interpersonal skills
- Requirements and business process modeling skills
- Experience with modeling tools
- Ability to work as part of a high powered, fast paced team
- Ability to execute tasks independently
- Detail oriented
- Excellent oral and written communications skills
- Knowledge of systems development life cycle
- Facilitation skills a plus
- Consulting experience a plus
- Data analysis a plus
- Willing to travel as needed based on project demands
